Reviewer's report

Title: Increased phosphorylation of histone H3 at serine 10 is involved in Epstein-Barr virus latent membrane protein-1-induced carcinogenesis of nasopharyngeal carcinoma

Version: 6 Date: 7 March 2013

Reviewer: Kai-Ping Chang

Reviewer's report:

The authors have addressed the reviewer's comment adequately.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
