Reviewer’s report

Title: The combination of ANT2 shRNA and hNIS radioidine gene therapy increases CTL cytotoxic activity through the phenotypic modulation of cancer cells

Version: 5 Date: 6 January 2013

Reviewer: Dongmei He

Reviewer's report:

I feel the manuscript’s publication could now go ahead.

Minor Essential Revisions: The assay of the level of caspase-3 activation (additional experiment) should be shown in the methods and results of the abstract.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
