Reviewer's report

Title: HP1-gamma expression is elevated in prostate cancer and is superior to Gleason score as a predictor of biochemical recurrence after radical prostatectomy

Version: 1 Date: 1 November 2012

Reviewer: William B Isaacs

Reviewer's report:

Major revisions
1. Unless appropriate references can be cited, the antibody used needs to be validated by western blot and appropriate positive or negative controls included.
2. Additional images should be provided - the single image of cancer provided is almost too good to be true!

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
