Reviewer's report

Title: MicroRNA profile of paclitaxel-resistant serous ovarian carcinoma based on formalin-fixed paraffin-embedded tumor samples

Version: 1 Date: 7 January 2013

Reviewer: Martin Quinn

Reviewer's report:

This seems to be an important validation of the use of paraffin-embedded samples in paclitaxel-resistant, serous ovarian cancer.

Unfortunately it is not publishable in its present form.

The authors need to have it revised by a native-English speaker with specific improvements to the Title, Abstract and Discussion.

I would be pleased to see a revised version.

Level of interest: An article of importance in its field

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.
