Reviewer's report

Title: Genetic association between selected cytokine genes and glioblastoma in the Han Chinese population

Version: 9 Date: 4 March 2013

Reviewer: Stefania Boccia

Reviewer's report:

The manuscript reports the results of a study on the association between some cytokine genes and glioblastoma in a Chinese population. The study design is sounding, the methodology is fine, and results properly reported.

Few comments:
- remove table 1 as useless;
- table 3 clarify the meaning of AIC and BIC
- remove table 4 and report the results only in the text.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
