Reviewer’s report

Title: The Roles of Notch1 Expression in the Migration of Intrahepatic Cholangiocarcinoma

Version: 2 Date: 4 March 2013

Reviewer: Hideo Baba

Reviewer’s report:

The authors have revised a study of the role of Notch1 expression in the migration of intrahepatic cholangiocarcinoma. However, some major problems remain to be solved in this manuscript.

Major comments
1. Authors said that Notch1 expression did not stimulate ICC cancer cell proliferation. However, Figure 3D and Figure 5 show that Notch1 is participating in cell proliferation. Authors have to settle them.
2. Figure 3A-B Figure 4A and Figure 5 has to be explained in detail. What each column means?

Minor comments
1. The authors should correct from “Figure4D” to “Figure4B” in line 20th in page 9.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
