Reviewer's report

Title: Antioxidant-mediated up-regulation of OGG1 via NRF2 induction is associated with inhibition of oxidative DNA damage in estrogen-induced breast cancer

Version: 2 Date: 2 May 2013

Reviewer: Filippo Acconcia

Reviewer's report:

The authors replied convincely to all my majorn concerns. However, I still believe it is necessary to include also the data indicated in the response as 'not shown'.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
