Reviewer’s report

Title: Low Annexin A1 expression is predictive for a benefit from induction chemotherapy in oral cancer patients with moderately/poorly pathologic differentiation grade

Version: 1 Date: 18 March 2013

Reviewer: Eng Huat Tan

Reviewer’s report:

The paper is generally well written though some minor grammatical errors and clumsy sentence constructions are detected.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
