Reviewer's report

Title: Annual Papanicolaou screening for 5 years among human papillomavirus-negative women

Version: 1 Date: 10 June 2013

Reviewer: Adhemar Longatto Filho

Reviewer's report:

This is a well-conducted study of great interest for screening programs. The authors analysed a well-controlled population and divided the objectives in pertinent tasks. The Discussion was very nicely elaborated and report a very interesting subjects to be take in account for the public health authorities elsewhere.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
