Reviewer's report

Title: Efficacy and Safety of Pharmacological Interventions in Second- or Later-Line Treatment of Patients with Advanced Soft Tissue Sarcoma: A Systematic Review

Version: 1 Date: 11 February 2013

Reviewer: Robert Amato

Reviewer's report:

This is a necessary review of the electronic literature databases (Embase, Medline, Medline In-Process, Cochrane Central Register of Controlled Trials, and Cochrane Database of Systematic Reviews) of soft tissue sarcoma. Trials were randomized or non-randomized trials with adequate end points. The tables and references were excellent. I approve this manuscript without revisions as it would serve as a great reference for physicians developing therapies for soft tissue sarcoma.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
