Reviewer's report

**Title:** Molecular fingerprinting reflects different histotypes and brain region in low grade gliomas.

**Version:** 2  **Date:** 1 July 2013

**Reviewer:** Federico Roncaroli

**Reviewer's report:**

The manuscript has been improved and all points raised have been clarified.

The first sentence of the introduction should be simplified. Something like ...

"Primary intra-axial paediatric low grade tumours include pilocytic astrocytoma (PA), pilomyxoid astrocytoma, diffuse fibrillary astrocytoma (FA), ganglioglioma (GG), desmoplastic infantile ganglioglioma (DIG), desmoplastic infantile astrocytoma, dysembryoplastic neuroepithelial tumour. For brevity, they will be hereafter defined LGG" ... will suffice

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.

**Declaration of competing interests:**

No competing interests
