Reviewer's report

Title: The maximum standardized uptake value of 18F-FDG PET scan to determine prognosis of hormone-receptor positive metastatic breast cancer

Version: 1 Date: 26 November 2012

Reviewer: Claudio Casali

Reviewer's report:

I think that the work is good enough; only one suggestion about figure: sometimes they are difficult to read.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
