Reviewer’s report

Title: Exosome derived from epigallocatechin gallate treated breast cancer cells suppresses tumor growth by inhibiting tumor-associated macrophage infiltration and M2 polarization

Version: 5 Date: 30 July 2013

Reviewer: vera Cappelletti

Reviewer’s report:

The revised version of the manuscript is definitely improved. The manuscript reports interesting experimental findings clearly explained and supported by sound data.

A final revision of the English is however necessary reach publication standards.

some minor revisions:
abstract, line 5: however NO DATA ARE AVAILABLE ON the influence ..... abstract, line 10: , cytokines BOTH WITH HIGH (IL6 and TGFb) and low (TNFα) EXPRESSION in M2....
page 4 line 6: effects on tumorigenesis IN studies.....
page 4 line 18: in the serum OR plasma of patients....
Methods, page 6 line 10 please answer the question reported in brackets
page 10: line 10 probably shoud be BY BOILING TISSUE SECTIONS
results, page 14, the last two lines: reformulate , the sentence is not clear.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
