Reviewer's report

Title: High SIRT1 expression is a negative prognosticator in pancreatic ductal adenocarcinomas

Version: 2 Date: 2 September 2013

Reviewer: Ilse Rooman

Reviewer's report:

The authors have delivered a satisfactory response to my comments. I have two more remarks to be made:

-The graph in Fig 3b should be in the same order as the Western Blot shown in Fig 3a

-It would be more informative to replace the Kaplan Meier analysis with Disease specific survival data rather than overall survival.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
