Reviewer's report

Title: Prognostic effect of preoperative Serum estradiol level in postmenopausal breast cancer

Version: 2 Date: 7 October 2013

Reviewer: Barbara J Fuhrman

Reviewer's report:

This manuscript describes interesting findings from a well-conducted study. It is based upon a small sample and a limited number of outcomes, but the methods are sound and well described, and the findings are novel, and the article should stimulate future research in this area. I have no major compulsory or essential revisions to suggest.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
