Reviewer’s report

Title: Overexpression of Heat Shock Transcription Factor 1 enhances the resistance of melanoma cells to doxorubicin and paclitaxel.

Version: 1 Date: 21 May 2013

Reviewer: Mohamed Hassan

Reviewer’s report:

Dear Editor,
I reviewed the manuscript by Vydra et al., entitled “Overexpression of Heat Shock Transcription Factor 1 enhances the resistance of melanoma cells to doxorubicin and paclitaxel. “. The study is interesting and provide a new insight to the reader of the journal, however, the authors have to improve the English language to correct the topographical mistakes over all the manuscript.

With regards
Mohamed Hassan

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
