Reviewer's report

Title: Estimate of the Global Burden of Cervical Adenocarcinoma and Potential Impact of Prophylactic Human Papillomavirus Vaccination

Version: 1 Date: 18 August 2013

Reviewer: Cristina Oliveira

Reviewer's report:

This is a well-conducted study of interest in its field. The authors analyzed pertinent issues related to ADC, as the global burden, the impact of cervical cancer screening, HPV type distribution and estimated the potential impact of HPV vaccination, using the latest available data from a variety of data sources including GLOBOCAN 2008, IARC, WHO/ICO and published literature. Overall, the study is consistent and adds scientific knowledge.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
