Reviewer’s report

Title: Bifractionated CPT-11 with LV5FU2 infusion (FOLFIRI-3) in combination with bevacizumab: clinical outcomes in first-line metastatic colorectal cancers according to plasma angiopoitin-2 levels.

Version: 1 Date: 11 June 2013

Reviewer: Niall Tebbutt

Reviewer’s report:

Generally well written phase II study, which is largely suitable for publication. There should be some discussion of the rationale for using bifractionated irinotecan as opposed to the standard folfiri regimen.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
