Reviewer's report

Title: Benign prostatic hyperplasia increases bladder cancer risk in diabetic patients: a population-based cohort study using the National Health Insurance in Taiwan

Version: 3 Date: 6 December 2012

Reviewer: Takayuki Sugiyama

Reviewer's report:

I think this revised manuscript have been corrected appropriately.

In Table3 (page 9), I found that there are little information about the "serum tumor markers".

Usually, many urologist don't use "serum" tumor marker in the bladder cancer therapy/testing. Many urologist use the "urine cytology" or "urine tumor marker/testing(NMP22, BTA test etc)".

Other reason, urologists may find a bladder tumor with urinalysis, ultrasonography.

But I think this point might be "non-essential" point.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
