Reviewer's report

Title: Therapeutic effects of lentivirus-mediated shRNA targeting of cyclin D1 in human gastric cancer

Version: 2 Date: 18 December 2013

Reviewer: Wantao Chen

Reviewer's report:

The authors have responded most of the comments by reviewers.

But one change related to cellular apoptotic rate must be explained clearly. In the revised version, the author changed the apoptotic rate to 29.19% in shscramble and 48.14% in shCCND1. Please add the steps for changing the rates in the material and method section.

Minor Essential Revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
