Reviewer's report

Title: Is Provider Type Associated with Cancer Screening and Prevention? Advanced Practice Registered Nurses, Physician Assistants, and Physicians.

Version: 2 Date: 31 January 2014

Reviewer: Hiroshi Ikai

Reviewer's report:

** Major Compulsory Revisions
(n/a)

** Minor Essential Revisions
- In p.4 line 19, the author reports that 'The Cancer Control Supplement had a response rate of 60.8%'. Based on this relatively low response rate, please discuss how the result could be biased.

- In Table 2, please check the number (666.8%) in the adjusted proportion received a Pap test among those with no healthcare provider.

** Discretionary Revisions
- P.2 and later: Descriptions of the type of medical providers do not agree in order, which could be confusing.
  -- current expression: 'an APRN/PA and a PCP' and 'a PCP without an APRN/PA'
  -- please consider changing to: 'a PCP and an APRN/PA' and 'a PCP without an APRN/PA'

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
