Reviewer's report

Title: Outcome after Intensity Modulated Radiotherapy for Anaplastic Thyroid Carcinoma

Version: 4 Date: 17 March 2014

Reviewer: Volker Rudat

Reviewer's report:

This is the comment to the revised manuscript.

My main comment was that it is very difficult to draw any meaningful comparative conclusions concerning local control and survival of a study of 13 patients. The authors have addressed the limitations of their study in the last sentence of the section "Discussion". In my opinion, a statement that their results are used to generate hypotheses which should be verified in appropriate future studies would be clearer.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
