Reviewer's report

Title: Knocking down CDK4 mediated the elevation of Let-7C suppressing cell growth in nasopharyngeal carcinoma

Version: 1 Date: 12 August 2013

Reviewer: Nagalakshmi Nadiminty

Reviewer's report:

Major Essential Revisions:
1) The authors should show whether E2F1 binds to the promoter of let-7c.
2) Fig. 3C does not convey the conclusion that let-7c inhibitor or mimic exert any significant difference on cell cycle progression. A more convincing figure is needed.
3) The authors state that let-7c affects invasion ability of NPC cells, but no data are presented to this effect.

Minor Essential revisions:
1) Fig 1D-labeling should be corrected.
2) Fig. 3A-both groups are labeled NPC. Which is NP?
3) At a few places in the manuscript, the authors refer to CDK4 as CKD4.
4) Several grammatical and syntax errors need to be corrected. In its present form the manuscript is difficult to comprehend at places.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.
