Reviewer's report

Title: Matrix metalloproteinase-10 promotes tumor progression through regulation of angiogenic and apoptotic pathways

Version: 1 Date: 23 February 2014

Reviewer: Mauricio Salcedo

Reviewer's report:

It could be necessary to improve the cervical images about "benign" lesions with a better resolution.

Please check the order of the figures. For this reviewer is not clear the figures 1

How the authors could discard the role of HPV in the cervical progression or which could be a probable model to activation the processes studied and HPV.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
