Reviewer’s report

Title: Transformation of nodular lymphocyte predominant Hodgkin lymphoma into "LP type" diffuse large B cell lymphoma

Version: 1 Date: 27 March 2014

Reviewer: Antonio C. Alves

Reviewer’s report:

1) The article is very interesting for the comparison of two different lymphomas with clinical and pathological diagnoses sometimes challenging.
2) The methods used are well explained and the results are clear in the tables.
3) Photographic documentation is well explained with good quality photomicrographs.
4) The discussion is extensive and well detailed.
5) The conclusions are appropriate with indicative for further research in the field of molecular biology.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
