Reviewer's report

Title: Gross cystic disease fluid protein 15 (GCDFP-15) expression in breast cancer subtypes

Version: 1 Date: 6 May 2014

Reviewer: Naoko Honma

Reviewer's report:

In this manuscript, Darb-Esfahani and colleagues have studied the clinical importance of GCDFP-15 expression within different subtypes of breast cancer. The manuscript is well written and the study was done for a large and well-characterized cohort of patients who underwent NACT; however, the main conclusion is almost the replicative of other studies. Minor comments are below.

Minor comments:
Page 6, line 3 from the bottom; “+” is missing after “HR+/HER2”.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
