Reviewer's report

Title: Ki67 expression and the effect of neo-adjuvant chemotherapy on luminal HER2-negative breast cancer - a Ki67 cut-off value for identifying patients who would benefit from chemotherapy -

Version: 7 Date: 10 May 2014

Reviewer: Peter Fasching

Reviewer's report:

Major: The title cannot stay how it is. There is no internal or external validation for finding a cut-off.

Major: Last sentence of the conclusion. The paper does not allow to move the findings into clinical practice.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
