Reviewer's report

Title: Ki67 expression and the effect of neo-adjuvant chemotherapy on luminal HER2-negative breast cancer - a Ki67 cut-off value for identifying patients who would benefit from chemotherapy -

Version: 7 Date: 21 May 2014

Reviewer: Carsten Denkert

Reviewer's report:

In the revised version, the main issues have been addressed.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
