Reviewer’s report

Title: A Collagen-Fibrin Patch (Tachosil(R)) for the Prevention of Symptomatic Lymphoceles after Pelvic Lymphadenectomy in Women with Gynecologic Malignancies: a Randomized Clinical Trial

Version: 4 Date: 8 June 2014

Reviewer: Valerio Gallotta

Reviewer’s report:

Major compulsory revisions:
1) select an homogeneous population (cervical and endometrial cancer imply different lymphadenectomies and LPS and LPT are too different approaches and may affect the results).
2) the number of harvested lymphnodes should ne described
3) altought very well planned, the study lacks of originality

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
