Reviewer's report

Title: HMGA1 and HMGA2 expression and comparative analyses of HMGA2, Lin28 and let-7 miRNAs in oral squamous cell carcinoma

Version: 5 Date: 2 July 2014

Reviewer: xiaomei lu

Reviewer's report:

The revised manuscript is now much improved. Most of the questions raised before have been solved in the current version of the manuscript. The number of tissues from human and canine are the limitations of the work which have been stated clearly. It is considered that the statistic result of IHC for human or canine OSCC tissue are equally important with pictures. However, this is an article of importance in its field.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
