Reviewer's report

Title: Stromal, rather than epithelial cyclooxygenase-2 (COX-2) expression is associated with overall survival of breast cancer patients - an immunohistochemical comparative study

Version: 1
Date: 23 July 2014

Reviewer: Ming Zhang

Reviewer's report:

1. The manuscript by Urban et al is interesting. The observation is novel.
2. The significant finding is that stromal expression of Cox2 is a better prognostic marker of breast cancer.
3. Title and conclusion need to be revised to reflect more precisely the data of this manuscript.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
