Reviewer’s report

Title: Identification of Oxidized Protein Hydrolase as a Potential Prodrug Target in Prostate Cancer

Version: 2 Date: 27 January 2014

Reviewer: Robert Getzenberg

Reviewer’s report:

In my opinion, the authors have done a reasonable job at addressing the points raised by the reviewers. I still feel that they may not be appropriately interpreting the potential clinical significance of their findings but at the same time, the studies are well controlled and the reported. The authors have toned down some of the language which makes the report more reasonable.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
