Reviewer's report

Title: Does the time between CT scan and chemotherapy increase the risk of acute adverse reactions to iodinated contrast media in cancer patients?

Version: 2
Date: 23 September 2014
Reviewer: xu xinglu

Reviewer's report:

This article, although is not very interesting, but reveal sense about the adverse reactions relation between ICM and chemotherapy.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
