Reviewer's report

Title: Oxaliplatin-based versus irinotecan-based hyperthermic intraperitoneal chemotherapy (HIPEC) in patients with colorectal peritoneal metastasis: a retrospective analysis

Version: 2 Date: 2 July 2014

Reviewer: Ravi Chokshi

Reviewer's report:

The authors should be commended for the data they have organized related to HIPEC's at their center. The 190 patients over a three year period is an impressive number of patients. In addition, investigating new regimens and their success is important in directing outcomes for all surgeons who provide similar services.

Major
Review of the literature with updated references.
Review of previous mCRC HIPEC treatment doses.
Small N from which to draw or infer differences in the absence of statistical support.

Minor
Clarification of tables.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
