Reviewer's report

Title: Localization of phosphorylated ErbB1-4 and heregulin in colorectal cancer

Version: 7 Date: 13 October 2014

Reviewer: christopher daly

Reviewer's report:

The statement that the authors have added on page 22, lines 16-23 is helpful. I do think it makes more sense to add this statement to the results section (for example, page 12 after line 17) rather than to the discussion.

Also, to make the issue clearer to readers, I recommend a slight modification of the second sentence: "Prior to immunoprecipitation, the nuclear and cytoplasmic fractions of cancer cell lines were normalized by total protein amount (1 mg) rather than by the number of cell equivalents of each fraction."

I also think that the third sentence of the statement can be removed, as it is not entirely clear.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
