Reviewer's report

Title: Which is the Best Postoperative Chemotherapy Regimen in Patients with Rectal Cancer after Neoadjuvant Therapy?: Analysis of Surveillance, Epidemiology, and End Results-Medicare Data

Version: 2  Date: 21 July 2014

Reviewer: Ruihua Shi

Reviewer's report:

Minor Essential Revisions:
1. there is a lack of explanation of statistical methods used in the study.
2. there are few explanations of the rationale for the study design.
3. The manuscript needs further carefully polished concerning English grammar, spelling and sentence structure.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests: I declare that I have no competing interests
