Reviewer’s report

Title: Gallbladder adenocarcinoma with sarcoid-like reaction in regional lymph nodes: report of a case

Version: 2 Date: 3 October 2014

Reviewer: Peter DiPasco

Reviewer’s report:

1. There are no major compulsory revisions applicable to this type of report (case study).

2. There are minor essential revisions that are necessary in this report, however this applies more to the category of quality of written English. These concerns will most definitely be remedied by having an individual with native English language skills edit for syntax and grammar.

3. I have only one discretionary revision request- a comment in the discussion on the influence positive intraoperative lymph node disease has on the surgical decision making of gallbladder carcinoma.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
