Reviewer's report

Title: L1CAM is preferentially expressed in triple-negative breast cancers and is inversely correlated with Androgen receptor

Version: 3 Date: 30 October 2014

Reviewer: Glen Kristiansen

Reviewer's report:

Major Points: none.

Minor Points:
- the authors ought to provide not only p-values but also correlation coefficients (e.g. p. 10, first para)
- please describe selection process of cut off value (same section) to delineate low and high levels of AR
- please be more specific in the discussion concerning the diagnostic value of L1Cam in breast cancer

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
