Reviewer’s report

**Title:** Case series: indoor-photosensitivity caused by fluorescent lamps in patients treated with vemurafenib for metastatic melanoma.

**Version:** 4  **Date:** 30 November 2014

**Reviewer:** Bart Neyns

**Reviewer’s report:**

The authors implemented the changes required by the reviewing process. I do agree now that this paper can be published. Just one small remark that I noticed on the row 77: I would change "unresectable stage III or metastatic melanoma" to "unresectable stage III or IV melanoma" because unresectable stage III is also metastatic melanoma (invaded lymph nodes are melanoma metastases).

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

None.
