Version: 2 Date: 21 Nov 2002

Reviewer: Prof Randall E Harris

Level of interest: A paper of considerable general medical or scientific interest

Advice on publication: Accept after discretionary revisions

The revised manuscript has appropriately addressed issues raised in the initial review. The last sentence of the manuscript should be revised slightly. At least one study (ref 23) was specifically designed to examine the association of lung cancer with aspirin and other types of NSAIDs.
