Reviewer's report

Title: Squamous Cell Carcinoma developing in the scar of Fournier's gangrene- Case report with review of literature

Version: 1 Date: 16 February 2004

Reviewer: suresh advani

Reviewer's report:

General

The above manuscript may be published with following discretionary revisions.

With these changes the paper/case report may be accepted for publication as it is indeed a rare case and needs to be published.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

1) In the discussion, pathophysiologic link between Fournier's gangrene and scar carcinoma and the likely etiologic link should have been discussed

2) Fournier gangrene management per se need not be the thrust of the article's discussion

What next?: Accept after discretionary revisions
