Reviewer's report

**Title:** Tamoxifen and the Rafoxifene Analog LY117018: Their Effects on Arachidonic Acid Release From Cells in Culture and on Prostaglandin I2 Production by Rat Liver Cells

**Version:** 2  **Date:** 17 June 2004

**Reviewer:** Francois Blachier

**Reviewer's report:**

I consider that the added paragraphs in the new version of the manuscript improve its quality. I regret that the Western blot (see point 4-B in Dr Levine's response) is indicated as data not shown since this result is important for the study presented. With this reservation in mind, the paper by Dr. Levine is in my opinion acceptable for BMC Cancer.
