Reviewer's report

Title: Plasma prolactin in patients with colorectal cancer

Version: 1 Date: 8 July 2004

Reviewer: David Morris

Reviewer's report:

General
Interesting paper about prolactin in colon cancer suggesting that it may a useful tumour marker and rival the use of CEA. This isn’t something which has received much attention recently and is interesting.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision
