Reviewer's report

Title: Plasma prolactin in patients with colorectal cancer

Version: 1 Date: 8 July 2004

Reviewer: Claudio Belluco

Reviewer's report:

General
In this manuscript Authors report the results of prolactin and CEA serum level measurement in 41 colorectal cancer patients and in 52 age and sex matched controls. The manuscript is poorly written in all its aspects and totally unacceptable for publication in any scientific journal.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Reject because too small an advance to publish in any journal

Level of interest: Too insignificant to warrant publication in any journal

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No

Declaration of competing interests:

None
