Reviewer's report

Title: Investigation of the expression of the EphB4 receptor tyrosine kinase in prostate carcinoma

Version: 2  Date: 23 August 2005

Reviewer: MS Kinch

Reviewer's report:

General

-----------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

The emphasis on the cell line data is still not compelling. The results with clinical samples are much more convincing.

What next?: Accept without revision

Level of interest: An article of importance in its field
