Reviewer's report

Title: Antimetastatic gene expression profiles mediated by retinoic acid receptor beta 2 in MDA-MB-435 breast cancer cells

Version: 3 Date: 20 June 2005

Reviewer: Doris Benbrook

Reviewer's report:

The investigators should address the question of could the retrovirus have integrated into the Xq28 region. An expert statistician should review the document, because the microarray analysis is complex.
