Reviewer's report

Title: Use of a recombinant S. typhimurium strain expressing C-Raf for protection against C-Raf induced lung adenoma in mice

Version: 4 Date: 10 January 2005

Reviewer: Carlos Alberto A Guzman

Reviewer's report:

General
The authors have seriously taken into consideration the suggestions from the reviewers for the preparation of the revised manuscript.

The outcome is a much more solid and significant piece of experimental work. The knowledge emerging from this paper, which can be accepted in its present form, would be of great interest for both vaccinologists and clinical/experimental oncologists.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
Not needed

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
Not needed

Discretionary Revisions (which the author can choose to ignore)
Not needed

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
