**Reviewer's report**

**Title:** Synchronous adenocarcinoma and carcinoid tumor of the terminal ileum in a Crohn's disease patient

**Version:** 1 **Date:** 29 August 2005

**Reviewer:** Edward V Loftus

**Reviewer's report:**

General
This is a case report of a patient with a seven-year history of Crohn's disease who developed obstructive symptoms and was found to have a mixed adenocarcinoid tumor of the ileum. The authors have revised the report satisfactorily.

------------------------------------------------------------------------------------------------------------------

**Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)**

------------------------------------------------------------------------------------------------------------------

**Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)**

There are a number of typographical and grammatical errors that should be corrected.

------------------------------------------------------------------------------------------------------------------

**Discretionary Revisions (which the author can choose to ignore)**

------------------------------------------------------------------------------------------------------------------

**What next?:** Accept after minor essential revisions

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No
