Reviewer's report

Title: JTE-522, a selective COX-2 inhibitor, inhibits growth of pulmonary metastases of colorectal cancer in rats.

Version: 7 Date: 17 January 2005

Reviewer: M. Michael M Wolfe

Reviewer's report:

The authors have responded satisfactorily to all the previous comments. The only "new" comment is that the authors should have cited at least important papers in Cancer Research (Yao et al., February 2003) and Gastroenterology (Fenwick et al., September 2003) regarding the effects of rofecoxib on metastases in colon cancer in mice and humans, respectively. This comment should be regarded as a discretionary revision since it was not offered in the original critique.

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No
