Reviewer's report

Title: P-cadherin expression and survival rate in oral squamous cell carcinoma: an immunohistochemical study.

Version: 1 Date: 8 February 2005

Reviewer: ANAK IAMAROON

Reviewer's report:

General

---------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

There are some misspelled words.

---------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

There are some misspelled (p.2, line 7) or repeated (p.4, line 8) words. On page 2 the first line from below, oral squamous cell carcinoma should be abbreviated as OSCC. Figure 1A, the orientation of the figure should be put in the way that the surface of the epithelium is towards the head of the page. It is easier for readers to understand this way.

---------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes

Declaration of competing interests:

I declare that I have no competing interests

The paper should be revised by a statistician since several advanced analyses were performed.
